BONNELL ALUMINUM AT A **GLANCE**

Bonnell Aluminum is recognized for providing effective and innovative solutions to our customers. This commitment is evident in the attention that all our team members bring to every aspect of design, production and customer care.

Our capabilities to design and manufacture custom-fabricated and finished aluminum extrusions cover virtually every industry across a wide range of product applications. Our goal is to give our customers the confidence of knowing their materials will be designed properly and manufactured to the highest standards.

YOUR SUCCESS IS OUR SUCCESS

Providing value to our customers is our top priority. This is why our customers' success and competitive market position is the benchmark by which we measure our company performance.

With over 1,800 employees and six manufacturing facilities located across the United States, our expertise in Lean Manufacturing, Total Productive Maintenance and operational excellence allows us to assign the highest priority to what matters the most to our customers' business.
